- E. SESSION SUMMARY

The theme of the document series target is "save the species". I could see whales moving through the water and space. This site has to do with interplanetary and environmental issues. A type of animal may be featured as a focus of concern. The letter S and the word super may be referred to in the document. The target revolves around a certain positive activity or track in response to our world. A circular or secular trek is the area where there is attention and movement of energy. It may involve an animal's journey.

CPYRGHT

BINARY STARS: ODD COUPLES

A MINORITY OF ONE,
our sun has no companion
star. But the majority of
stars appear in company. Our
nearest stellar neighbor,
Alpha Centauri, is a three-
star system, while Castor, in
the constellation Gemini,
must be counted as a trio of
double, or binary, stars
orbiting a common center.

When binary stars are
close enough to interact with
each other, they produce
some of the most explosive,
peculiar, and baffling events
yet observed.
